

CLOUDPOINT GEOSPATIAL

Data Collection

Water, Sewer, Electric, Gas, and Fiber

Cloudpoint Geospatial's staff consists of certified GIS professionals and licensed professional engineers with over thirty years of combined experience in public services and the utility sector. We are a professional services provider offering GIS, mapping, inventories, data collection, and asset management. Our data collection practice is to consistently achieve reliable vertical and horizontal accuracies for creating the most up-to-date GIS layers for your organization.

Benefits of high accuracy GNSS:

- ◆ Ability to relocate assets using mobile device
- ◆ Gather Flowline & Pipe Slope data
- ◆ High quality as-built data
- ◆ Damage prevention for utilities

Additional Services:

- ◆ Mobile GIS solutions
- ◆ Inventory Tags and Barcodes
- ◆ GPS Training
- ◆ Drone Imagery
- ◆ Utility network modeling
