Enhancing Campus Utilities: A Look at 3 Key GIS Trends

In today's rapidly changing world, effective utility management is essential to ensure a reliable supply of services such as water, electricity, and telecommunications. Campuses such as universities, hospitals, and local governments are often overwhelmed with the amount of utilities that lie in small areas or narrow corridors. Geographic Information Systems (GIS) has emerged as a powerful tool that enables utility companies and organizations to optimize their operations, improve decision-making, and enhance overall efficiency.…READ MORE

Adding Two New Faces to the Crew!

Jacob joins us from Southern California. He holds a degree from UCLA and previously worked as a GIS Technician for the City of Menifee. READ MORE about Jacob here!

Jim joins us part-time from his home in Wisconsin. As the retired LIS Supervisor for Waukesha County, he has a breadth of GIS knowledge and is very involved with the Wisconsin Land Information Association, among other organizations. We are excited to have him supporting our business development efforts in Wisconsin. READ MORE about Jim here!

Exploring the Features in ArcGIS Enterprise 11.1

ArcGIS Enterprise 11.1 arrived with a host of new features and enhancements, marking a significant leap from previous versions. In this post, we delve into the key highlights of this release, covering system requirements, notable changes, and the latest functionalities that make ArcGIS Enterprise even more powerful and user-friendly....READ MORE
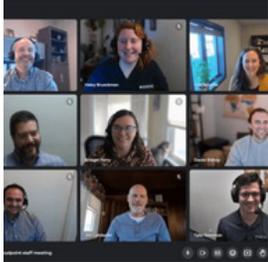

Service Spotlight: Blocks of Hours

Cloudpoint's services come in a wide range of shapes and sizes, from large data collection projects to short-term kickstart, multi-year managed service contracts, and blocks of hours. A block of hours is one of our simplest, lowest cost, yet most wide-ranging offerings. These are a great way to receive support from our highly knowledgeable team for a reasonable price....READ MORE
