# KEEPING UP WITH CLOUDPOINT

Official Newsletter of Cloudpoint Geospatial

## Cloudpoint Announces New Webinars for Remainder of 2022

As the pages of the calendar continue to turn and the cool Spring turns into a scorching Summer, Cloudpoint continues its tradition of curating relevant, educational content for the GIS world. While we do not claim to know everything about Geographic Information Systems, we do know a LOT. So with our powers combined we have curated a whole batch of webinars, scheduled out through the rest of the year. Sign up for one, or sign up for all, but make sure to take advantage of our free transfer of knowledge and sign up today. We'll see you there!

 <p>MAPPING SUBDIVISIONS WITH AND WITHOUT CAD FILES September 7th, 2022 11:00-11:30 a.m. (CST)</p>	 <p>BUILDING AND MAINTAINING A FIBER OPTIC NETWORK USING ARCGIS ONLINE September 14th, 2022 11:00-11:30 a.m. (CST)</p>	 <p>ARCGIS ENTERPRISE 11: WHAT'S NEW AND TIPS FOR UPGRADING October 5th, 2022 11:00-11:30 a.m. (CST)</p>	 <p>NG9-1-1: HOW TO SYNCHRONIZE BORDER DATA October 12th, 2022 11:00-11:30 a.m. (CST)</p>
 <p>HOW TO BUILD A SPACE PLANNING DASHBOARD USING GIS AND ARCGIS ONLINE October 26th, 2022 11:00-11:30 a.m. (CST)</p>	 <p>MAXIMIZING YOUR ARCGIS ONLINE SUBSCRIPTION November 9th, 2022 11:00-11:30 a.m. (CST)</p>	 <p>DISCOVERING NEW CAPABILITIES WITH THE PARCEL FABRIC AT ARCGIS PRO 3.0 November 23, 2022 11:00-11:30 a.m. (CST)</p>	 <p>A COMPLETE DEMONSTRATION OF THE SIGNOPS APPLICATION December 7th, 2022 11:00-11:30 AM (CST)</p>

## The Force is Strong with the Iowa Technology and Geospatial (ITAG) Crew

Erin and Hunter had a great trip to West Des Moines for Cloudpoint's first foray into Iowa for a conference. The Iowa Technology and Geospatial Conference (ITAG) is a unique mash-up of GIS professionals from the Iowa Geographic Information Council and IT experts from the Iowa Counties Information Technology organization.

# Onward and Upward: Cloudpoint Expands Their Reach in Wisconsin, Missouri, and California

The past couple months have brought a number of new clients to the Cloudpoint roster. Being born and raised in central Illinois means that most of our clientele resides in the Prairie State, however if the past couple of years has taught us anything, it is the ease and ubiquity of doing work remotely. To that end, Cloudpoint has been pushing the envelope (sometimes literally with our marketing letters) when looking for GIS work across the country.

# Better Together: Collecting GIS Data with Trimble Catalyst GNSS and ArcGIS Online

Trimble is a global leader in positioning technology and Esri is a best-in-class geospatial software provider. When these two powerhouses converge, great things happen. So you may be asking, 'How do I get the best of both worlds from these vendors? Now with Trimble Catalyst, getting high accuracy GNSS positioning integrated with the mobile ArcGIS platform has never been easier.

## Conferences

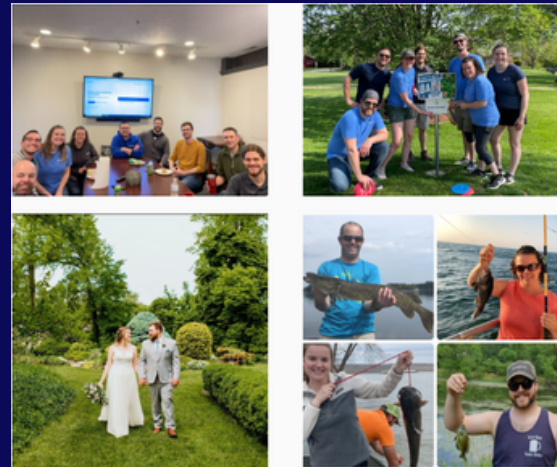

Campus FM Technology Association Conference

AUGUST 2-5, 2022

Water District & Sewer Collection Conference

SEPTEMBER 28-29, 2022

## Staff News:

It was an exciting quarter for the Cloudpoint team. We enjoyed a team lunch together and tried our hand at disc golf (posing for the obligatory picture in front of our sign, of course!) Our marketing coordinator, Sahara, got married (and made the whole team jealous during her honeymoon to Costa Rica), and our team members shared memories of their own fresh catches on National Go Fishing Day.
